PROFILE

A LITTLE INFORMATION ABOUT ME

I've had an inspired career spanning from psychology to technology. Along the way I've practiced building empathy with service users for 2 years placed in exciting situations. I trained to code for 3 months to learn programming fundamentals. I've always had an eye for design and since learning about usability applications I've found my dream job – UX and Interaction Design.

EXPERIENCE

THE COMPANIES I'VE WORKED WITH

2016 — *Student*
Makers Academy, London
Development with HTML, CSS, JS and Ruby
